**Introduction**
This ESL dictation helps students with their communication and listening skills.

**Procedure**
Divide the students into pairs (A and B).

Rearrange the chairs so there are two rows of seats facing each other. Make the space between the two rows quite big. The pairs sit opposite each other.

Example:

A <------> B
A <------> B
A <------> B
A <------> B

Hand out a different part of the text to each row.

Student A starts by reading the first part of their text to Student B.

Student B listens and writes what they hear.

When Student A has finished reading, the two students swap roles and Student B starts reading their text to Student A.

This continues until the text is complete.

Students have to listen very carefully to understand their partner as everyone will be talking at once and working at different paces.

The activity can get quite noisy, but it's a lot of fun for students.

When everyone has finished, have the pairs of students sit together and go through their texts to check for spelling mistakes and misunderstood words.
