**Introduction**
In this rewarding worksheet activity, students play a game where they make predictions about a partner's future plans using the future simple form 'will' and 'won't'.

**Procedure**
Divide the students into pairs.

Give a copy of the worksheet to each student.

Tell the students that they are going to play a game where they make predictions about a partner's future plans using the future simple form 'will' and 'won't'.

The aim of the game is to make the most correct predictions.

Have the students read the predictions on the worksheet and think about their partner’s future plans.

Students also write three more predictions of their own at the bottom of the worksheet.

Students then write 'yes' next to the prediction if they think it will come true or 'no' if they think it won't. They do this without consulting their partner.

If a student writes 'yes', they must think of a reason why.

The students then take it in turns to tell their partner about their predictions and reasons using the future simple form 'will' and 'won't'.

Their partner tells them if their predictions are right or wrong.

If a prediction is correct, the student puts a tick in the last column. If it's wrong, the student puts a cross.

The student with the most correct predictions wins the game.
A. Read the predictions and think about your partner's future plans. Make three more predictions of your own at the bottom of the worksheet. Then, write 'yes' next to the prediction if you think it will come true or 'no' if you think it won't. If you write 'yes', think of a reason why.

B. Now, take it in turns to tell your partner about your predictions and reasons using the future simple form 'will' and 'won't'. Put a tick if your prediction is right or a cross if it's wrong.
