

**Student B**

You and Student A are classmates. It's the start of the summer holidays. However, your teacher has asked some students to help prepare for next Sunday evening's summer school fair. One of you has to go and help, so who's it going to be?

You and your partner both have four free periods next week. To help decide, you're going to play a game where you must find your partner's free periods. You must find all four free periods to win.

Take it in turns to ask your partner about his or her arrangements for next week, e.g. 'What are you doing on Wednesday afternoon?' Reply to your partner's questions using the present continuous for future arrangements, e.g. 'I'm studying English'.

The first person to find all their partner's free periods can enjoy their free time next week. The loser has to spend his or her free time helping the teacher prepare for the school fair!

Below is a copy of your diary for next week.

	Mon	Tues	Wed	Thurs	Fri	Sat	Sun
Morning	go to the dentist	go to the library	do aerobics	go to the market	<b>free time</b>	go camping	travel home
Afternoon	study English	visit art gallery	study Spanish	<b>free time</b>	bake a cake		<b>free time</b>
Evening	play basketball	<b>free time</b>	have a haircut	go to cooking class	meet Amy		go to the school fair

Write Student A's answers in the diary below.

	Mon	Tues	Wed	Thurs	Fri	Sat	Sun
