

## Activity Type

Grammar Game:  
guessing, forming  
questions (pair work)

## Focus

*Wh* questions

## Aim

To listen to a set of  
answers and try to guess  
the questions being  
asked.

## Preparation

Make one copy of the  
worksheet for each pair  
of students and cut as  
indicated.

## Level

Pre-intermediate (A2)

## Time

20 minutes

## Introduction

In this *Wh* questions game, students listen to a set of answers and try to guess the questions being asked.

## Procedure

Divide the students into pairs (Student A and B).

Give each student a corresponding worksheet.

Tell the students not to show their worksheets to each other.

Student A starts by reading the first answer on their worksheet to their partner who listens and guesses the question, which is on Student A's worksheet in brackets.

If Student B guesses correctly the first time, they score three points, on the second try two points, and on their last try one point.

Student B then reads out their first answer to Student A, who guesses the question and so on.

The student with the most points at the end of the game wins.

Alternatively, you can make the game more competitive by giving out the Student A worksheet first.

Student B then races to guess all the questions in the fastest possible time.

Afterwards, give out the Student B worksheet and Student A races to complete all the questions as fast as possible.

The student who guesses all the questions in the fastest time is the winner.
