#### Introduction

In this time expressions activity, students conduct a survey where they ask and answer questions that use past, present and future time expressions.

#### **Procedure**

Divide the students into groups of 12 or less.

Give each student a card.

Tell the students that they are going to practice various time expressions by conducting a survey.

Each student then prepares the yes/no question they need to ask to find out the information on their card, e.g. 'Did you check your email this morning?'

Afterwards, review the questions as a class.

Students then go around their group, asking and answering the questions.

Students note the number of people who answer yes or no to their question on the back of the card.

Finally, each student reports back their findings to the class.

For example, a student with Card A might say, "Ten people in the class checked their email this morning."
