Introduction

In this weather activity, students learn weather vocabulary and practice asking and answering questions about the weather.

Procedure

Divide the students into pairs (Student A and B).

Give each student a corresponding worksheet. Tell the students not to show their worksheet to their partner.

Ask the students to look at the pictures and complete sentences 1 to 8 with the weather words from the box.

Exercise A - Answer key

- | | |
|-----------|------------------|
| 1. hot | 5. cloudy |
| 2. sunny | 6. raining/rainy |
| 3. windy | 7. snowing/snowy |
| 4. stormy | 8. foggy |

Review the adjective and verb forms (e.g. raining/rainy) with the class.

Next, focus the students' attention on the chart.

Tell the students that they are going to complete the missing information in the chart by asking and answering questions with their partner.

Go through the example questions on the worksheet with the class. Check the students know how to answer the questions by reminding them of the structure used in the sentences in the first exercise. You may also need to pre-teach the words: degrees Celsius, minus

Students then ask and answer questions and complete their charts with the missing information.

When the students have finished, they compare charts to check they have the correct answers.

Afterwards, students ask and answer questions about what the weather was like in the past with their partner.
